University Laboratories

Educational Furniture

Cleanroom Furniture

We understand that Clean rooms require a high specification of laboratory furniture. Our clean rooms are designed with tresspa worktops due to its acid resistant properties. A clean room laboratory needs to be a controlled environment. Designing such lab is a complex challenge that requires a detailed understanding of the needs of a clean room. Lab UK can offer full turnkey design and installation, upgrading or refurbishment of your clean room. We can apply our expertise to created a laboratory environment that was specifically designed for the kind of research and experimentation you wish to carry out.

Industrial Laboratory Furniture

All our made to order lab furniture can be made for Industrial laboratories such as food testing labs and pharmaceutical labs.

We can supply a range of services to go alongside your furniture to meet your requirements. Whether it be standard water taps such as swan neck taps, mixer taps or bib taps. We also supply numerous types of gas taps.

QUALITY BY
DESIGN

We also manufacture shelving such as reagent shelving, that is typically used in research and testing laboratories.

University Laboratory Furniture

Our University laboratory furniture can be designed for any sort of laboratory needed.

We also offer bespoke furniture for testing labs and research labs.

As with any of the educational furniture we offer, Our research laboratories and testing laboratories can include a range of services. These include standard swan neck water taps, mixer taps and bib taps, Sinks, Gas taps and fume cupboards.

Educational Furniture

We manufacture all elements of furniture within every educational setting.

Furniture for:

- Early Years
- Key Stage 1
- Key Stage 2
- High School
- Colleges

We understand that furniture needs to meet the requirements dependant upon the age of the pupils in the class. We manufacture our products ourselves in our workshop and therefore are not restricted by height.

We supply both fitted and loose education furniture, fixtures and fittings to meet your design criteria.

Lab UK can manufacture and Install or just simply supply lose tables for primary schools and secondary schools that can include gratnells trays if needed.

Educational Furniture

High School furniture we can make can be for:

- Food Technology
- Science Lab Furniture
- Textiles Furniture
- Design and Technology

Room Furniture

- I.C.T Suites
- Art and Design Lab Furniture
- Music Room Furniture

We can design science labs to include fixed island benches, service pods to include services such as gas, water, waste plumbing and electrics as well as fume cupboards for high schools.

QUALITY BY
DEDICATION

"Our furniture layouts are designed to comply with the latest standards and take into account all the latest requirements"

WALL UNITS

Lab UK manufacture wall units for all Educational sectors as well as Laboratories. As we manufacture them ourselves they are not limited to be standard sizes and therefore units can be made to whatever size desired for your intended purpose.

We can manufacture double or single wall units, as well as glass fronted. Our wall units can be made in any colour needed. Our unit colours can be found at the back of this brochure.

HTM71 sloping top wall mounted units can also be manufactured to order.

BASE UNITS

We manufacture:

- Single Cupboard Units
- Single Drawer line Units
- Single Drawer Units
- Double Cupboard Units
- Double Drawer line Units
- Double Drawer Units

As well as service units in any size your require.

These units can be fixed or mobile and can be made to any size and in a variety of colours and finishes.

Metalwork

Lab UK supplies framework that can be tailored to any design you require. Our expert team can give advice on what they think would suit to get the most out of your laboratory.

There is a range of options to choose from that include:

- 'C' Frame Systems
- 'H' Frames Systems
- Cantilever Frame Systems
- Table Frames
- Double H Frame Systems
- Double C Frame Systems

Examples

of Frames

Cantilever Frame System

Table Frame

The cantilever frame system is an extremely strong supporting frame. The vertical support leg is set sufficiently far back to be unobtrusive, yet balanced in position to give full support to all equipment. The under bench span rails are sited to allow a wide range of sinks without compromising on their weight bearing capacity.

Tables can be made either fixed or mobile. Our metalwork for tables are strong. As on the photo below there is also the option to have a unit under the worktop.

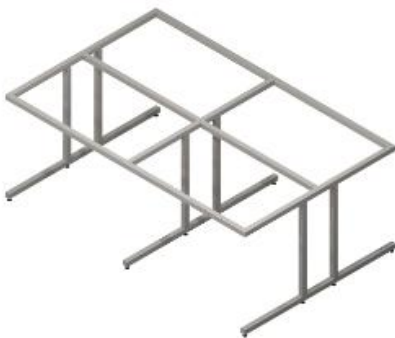

Examples

of Frames

C Frame System

Double C Frame System

Provides the ultimate in flexibility and strength. The units can either be C-Frame mobile units or under slung on gauge epoxy coated steel horizontal rails.

Double C frames are used for the same reason as above but for a double width workbench.

Examples

of Frames

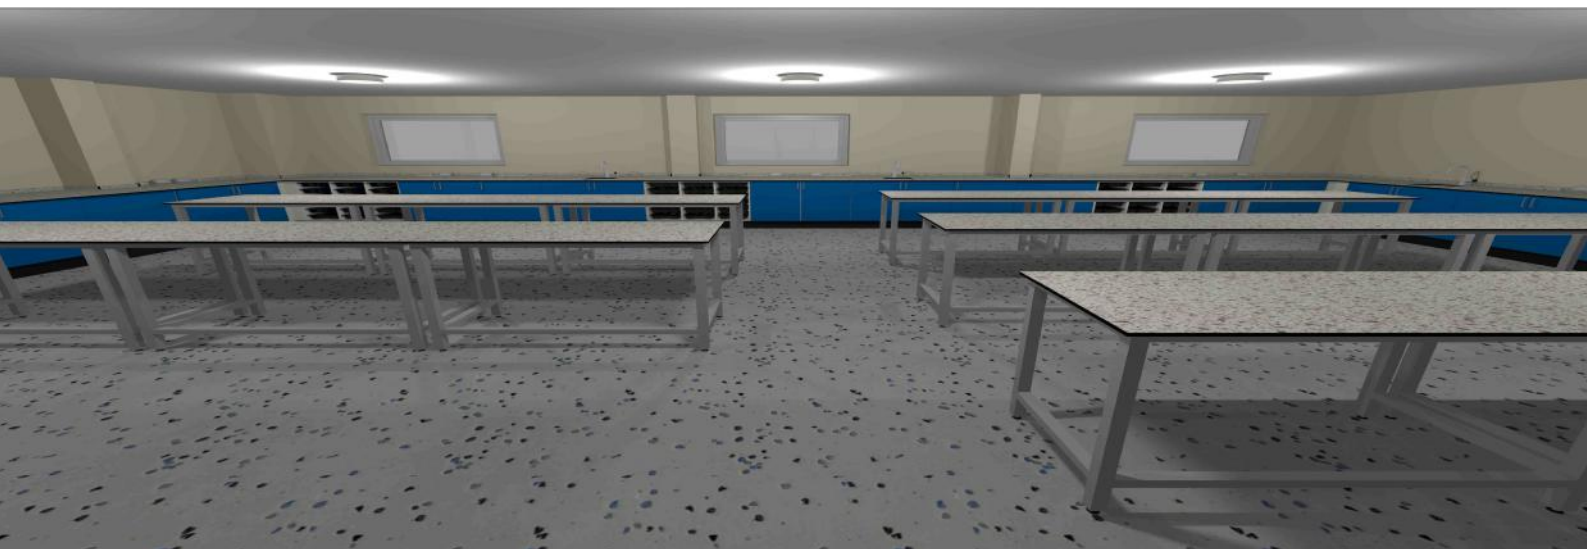

H Frame System

Single H frame systems are strong. Mostly used in a laboratory that uses heavy equipment on the benches. Units can be fitted around this type of metalwork.

Double H Frame System

Used for the same purpose of the single H frames. For units to slide in under the frame or to create knee space for a workstation but for a double width worktop.

Height Adjustable Tables

Height adjustable tables give you the flexibility to adjust the height of your bench. They can be made in Trespa Top lab with a crank handle. Below is an example of the kind of tables we can manufacture.

This type of bench allows your table to be at whatever height you desire and therefore can be used for work when either standing or seated.

Mobile Tables

Mobile tables are manufactured on a metal framework fitted with lockable castors.

The frames can be made to be a table or to have storage underneath as shown on the photo below.

Mobile tables give you the freedom to be able to move your work round from one workstation to another.

As we manufacture to order, all of our furniture can be made at any height or size required.

Integrated Panel Systems

Lab UK's Healthcare IPS panels are available in a huge range of finishes and colours. Our tailored service means all design criteria are met for every job we undertake. We manufacture and install educational IPS and healthcare IPS.

We supply IPS panels for fast installation and removal using Keku click and fix clips. We can also manufacture IPS panels that have a hinged access and can be supplied with locks for areas where additional security is needed.

Whatever the requirement, we can ensure that our IPS panels will be quick to remove and easy to replace when access is needed.

Cubicles

Cubicles can be manufactured to meet most specifications in a variety of styles and colours to meet all applications of washroom environments.

Cubicles are manufactured from 13mm solid grade laminate, with all edges profiled and polished.

We can also offer cubicles on a budget. they are made from moisture resistant MFC complete with 2mm PVC edge treatment.

Cubicles are produced to a very high standard using all leading brands of laminates including Formica and Polyrey. We also offer a wide range of stylish and robust cubicle fittings to suit.

Washrooms

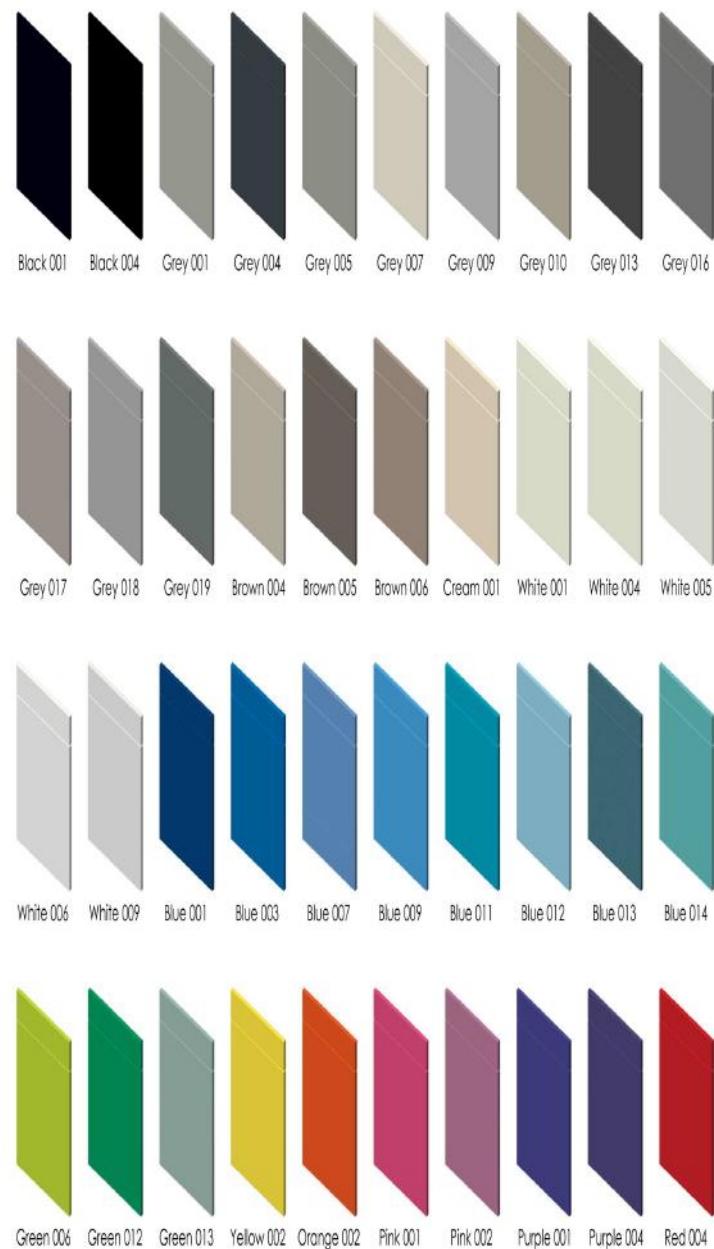

Our washroom systems can be manufactured to match most specifications in a variety of styles and colours to meet all applications of washroom environments.

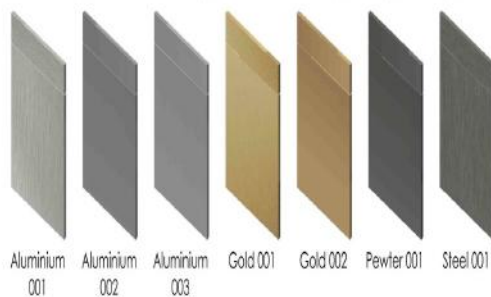

Our washrooms can be manufactured to any height size your require as, with all our work, it is made to order. Therefore we are not restricted to standard sizes. This is useful for washrooms in an educational setting as different heights are required for EYFS, Key stage 1 and Key stage& 2.
